Wireless Water Leak Detector

I. General Description

This product is a wireless water leak detector. When the detector detects water immersion, it will send out a wireless alarm signal.

II. Specification

Power supply: 2* AA batteries

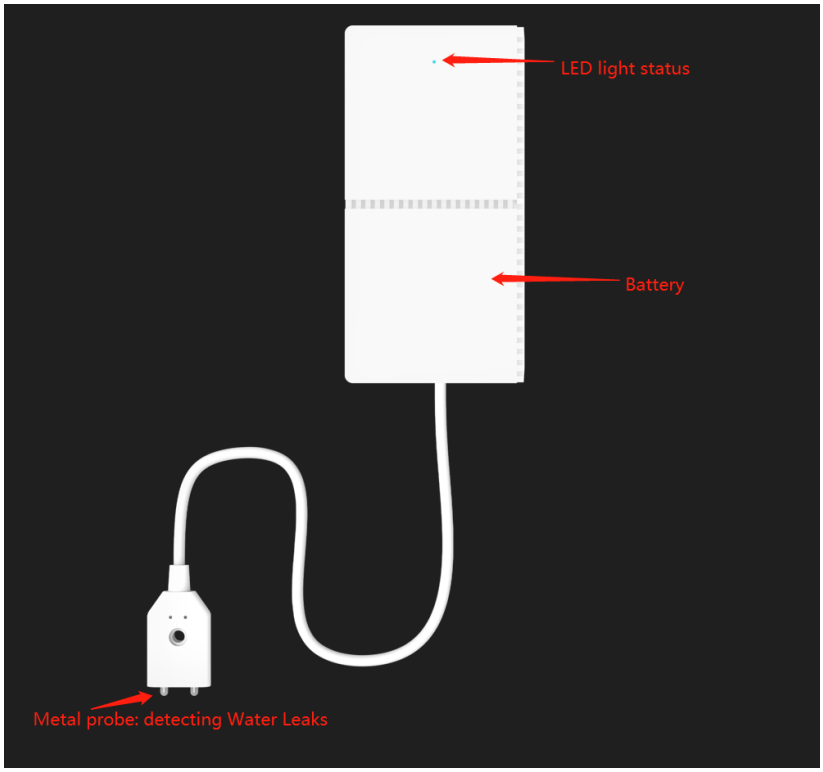

Voltage: DC3V

Standby current: <5uA

Alarm current: <20mA

Wireless frequency: 433M/1527/330K

Wireless distance: >=100 meters (open distance)

III. LED light status

	Device	LED Light
1	Alarm (battery voltage is normal)	LED light stays on for 1.5s
2	Alarm (low battery voltage)	LED light flashes quickly for 1.5s
3	Power-on	LED light stays on for 1.5s

IV. Detector pairing

1. Put the alarm host into pairing state.

2. Place the sensor metal probe of the detector into the tap water. The detector LED stays on for 1.5 seconds and emits a wireless alarm signal.

V. Detector installation

Paste the double-sided tape on the back of the detector and install it where water leakage needs to be detected.
